## OBJECTIVE

---

A passionate and goal-oriented Computer Science student with strong foundational knowledge in full stack web development and practical experience through a virtual internship at Prodigy Infotech. Skilled in React.js, Node.js, Express.js, and MongoDB, with a focus on building responsive and efficient web applications. Gained exposure to industry standards in development, testing, and deployment. Eager to contribute to real-world projects, enhance technical expertise, and grow within a collaborative team environment.

## EDUCATION

---

**Bachelor of Computer Applications (BCA) : I.P. (P.G.) College, Campus-2, Bulandshahr** 2023 - 2026

CGPA :- 7.0

## SKILLS

---

<b>TECHNOLOGIES</b>	HTML, CSS, JavaScript, Node.js, JSON.
<b>FRAMEWORKS</b>	React.js, React Router DOM, Tailwind CSS, Express.js, Multer, CORS.
<b>DATABASES</b>	MongoDB, Mongoose.
<b>OTHER TOOLS</b>	Git, GitHub, VS Code, Vercel, Clerk.
<b>SOFT SKILLS</b>	Communication, Team Work, Time Management, Problem Solving, Patience, Adaptability.

## EXPERIENCE

---

<b>WEB DEVELOPER</b> Prodigy Infotech	Aug 2025 - (1 Month) <i>Virtual Internship</i>
--	---

- Strengthened communication and collaboration skills while working independently on tasks and reporting progress effectively.
- Developed a strong understanding of real-world development workflows, improving my ability to work in structured, deadline-driven environments.
- Designed efficient and scalable web applications that enhance the user experience.

## PROJECTS

---

### Hotel-Booking-Website.

- **Hotel Registration Feature :-** Implemented a secure hotel registration system enabling users to register their hotels with essential details, supporting authentication and ownership verification through token-based access using modern MERN stack practices.
- **Role-Based Access Control :-** Implemented role-based dashboard access, enabling hotel owners to manage listings and bookings, while normal users can browse, book, and track reservations securely with personalized experiences.
- **Email Confirmation Integration :-** Integrated automated email notifications to confirm hotel bookings, using a transactional email service (like Nodemailer), enhancing user trust and communication after each successful transaction.

### Spotify Clone.

- **Music Library:** Provide users with a **collection of songs, albums, and artists to explore and play.**
- **Playback Controls:** Include essential controls such as **play, next, and previous** for a smooth listening experience.
